Hi, since some time I'm a CPU issue on some CTs,  
sometimes is one CT, and sometimes is other CT,  
but every weeks I need to reboot the node for this cause,  
If I try to stop the CT, I can't... timeout.  
If I try to do a vzctl enter CT, I can't... timeout.  
But all other CTs on this node run Ok.  
If I try to create a new CT during the CPU overload, I can't... timeout.
