Subject: What happen when i assign more memory than is available?
Posted by postcd on Sat, 21 Sep 2013 12:29:11 GMT

Hello,

memory is burstable in OpenVZ VMs, so i want to ask what happen when the memory is distributed between VMs, like 29GB is distributed in guaranteed memory, server has 32 GB and i create new 8GB VM/VPS ....?
Thank you
