I'm seeing this happen lately. Not sure what changed that is causing it:

```
Nov  2 16:13:01 vps6 kernel: [194472.683154] ata2.00: exception Emask 0x0 SAct 0x0 SErr 0x0
action 0x6 frozen
Nov  2 16:13:01 vps6 kernel: [194472.684488] ata2.00: failed command: FLUSH CACHE
Nov  2 16:13:01 vps6 kernel: [194472.685789] ata2.00: cmd e7/00:00:00:00:00/00:00:00:00:00/a0
tag 0
Nov  2 16:13:01 vps6 kernel: [194472.685792]          res 40/00:04:a7:c4:a8/00:00:00:00:00/40
Emask 0x4 (timeout)
Nov  2 16:13:01 vps6 kernel: [194472.688386] ata2.00: status: { DRDY }
Nov  2 16:13:01 vps6 kernel: [194472.689714] ata2: hard resetting link
```

File system switches to read only. I'm still investigating.

I have suspicion that this is about failing hard disk or raid controller.

Hello, mperkel!

Could you send output of following commands (you can repalce /dev/sda by your actual device names):

```
smartctl --all /dev/sda
smartctl --all /dev/sdb
```

I tought it's a problems with sata cables or disk entirely.
