Hello,

We have noticed a strange behaviour of the OpenVZ server that we have. One of the machines on the node is highly loaded. All of its resources are taken, but there are many free resources on the node, as you can see on the below results.

```
[root@ovz01 ~]# top
top - 18:26:13 up 28 days, 9:02, 1 user, load average: 14.04, 11.09, 7.37
Tasks: 315 total, 21 running, 292 sleeping, 0 stopped, 2 zombie
Cpu(s): 16.7%us, 1.8%sy, 0.0%ni, 81.5%id, 0.0%wa, 0.0%hi, 0.1%si, 0.0%st
Mem: 8031308k total, 6993140k used, 1038168k free, 478168k buffers
Swap: 10485752k total, 0k used, 10485752k free, 5125828k cached
```

- This is the leverage of all ctids :

```
[root@ovz01 ~]# vzlist -o ctid,lverage
CTID    LAVERAGE
102 0.00/0.00/0.00
105 14.31/11.68/7.90
106 0.00/0.00/0.00
107 0.00/0.00/0.00
108 0.00/0.00/0.00
109 0.00/0.00/0.00
```

- The CPU utilisation :

```
[root@ovz01 ~]# vzcpucheck
Current CPU utilization: 1042
Power of the node: 480017
```

- The kernel version :

```
[root@ovz01 ~]# uname -a
2.6.32-042stab079.5 #1 SMP Fri Aug 2 17:16:15 MSK 2013 x86_64 x86_64 x86_64 GNU/Linux
```

My question is - Can we trust the TOP command and only the VM resources are taken, but not the resources of the whole node, or there is another better way to monitor the node resources ?

Thank you in advance!

Hello!

Could you show your /etc/vz/conf/\$CTID.conf file?

Hello,

Thank you for your answer. Please refer to attached zip file.

Best Regards!

Hello!

Thank you! Could you show top from overloaded container and ps aux from it?

Hello,

I'm sorry for the late answer.

Please refer to the two attached load logs for a container. Currently we don't have a "ps aux" output, but next time when a load happens we will send you the ps aux output. Note that a load can happen 5 times per day, but it can happen only 1 time for a month, so there is no estimate time.

We are using this software to monitor our OpenVZ : download.openvz.org/contrib/utils/monbean/
During a load we receive a email message that container uses all of its resources.

Tell me if you need any additional information.

Regards!
