i dont know exactly why my topic is closed and nobody is able to answer my last - simple -
question.
or does i misunderstand the function of a official support forum?

so please answer my last question / open thread.

I locked topic because everything is already answered and you only need to understand man
pages and answers:

Quote:cpuunits is relative value

Quote:If you want direct answer, imho leave cpuunits as is. for better control of cpu limitations for
CT's I already answered in my first reply.

relative to output of vzcpucheck? is this correct? - *that* is what i want to know. ultimate last final
question about this.

thanks for your help.

Thank your for your patience.

You need to know that i am little bit silly but i understood it now. I understand now the openvz wiki page too with my bad english)
