Hi,

I've been trying to set up IPv6 for OpenVZ containers at Hetzner (German hoster). As they have some very special network configuration, I had no success with any of the guides that I found.

Has anyone a config to share in order to get IPv6 connectivity for OpenVZ containers at Hetzner?

Thanks  
Steffen

Hi,

I did it that way:

[www.catfind . it/de/2012/01/hetzner-root-server-ipv6-und-openvz/](http://www.catfind.it/de/2012/01/hetzner-root-server-ipv6-und-openvz/)

You maybe have to change some settings but most should work.

Regards
