If any one is interested I have a openvz HN running centos 5.10 final up to date with networking/nat issues.
Multiple networking issues that I need to have resolved.
I am looking for a commercial/paid support for my server.
Let me know.

openvz wiki advertises paid support by parallels:
http://www.parallels.com/support/virtualization-suite/openvz /

dunno is this includes issues solving or only bug reports and feature requests, but you can ask them.

I already try, they do not answer the emails nor the phones.
The support options listed on the website are only for their services.
