Subject: ip_conv: command not found (Debian)

After upgrading to Debian wheezy the IP address is not set when starting a container.

Error message:
Adding IP address(es): xx.xx.xx.xx
/bin/bash: line 558: ip_conv: command not found

ip_conv is used in /etc/vz/dists/scripts/debian*.sh since 5/7/2011 according to git.openvz.org

however for Debian there is no command/binary "ip_conv", and I cant find any information about it. I would be glad for any hint what's wrong - is this a bug in the vzctl scripts?

Regards,
Oliver
