Hi.

When trying to compact one of my VPS, it does nothing.

It is currently a root.hdd file with 750GB, but inside the container, only 250GB are used.

Is this a bug or what?

```
[root@CentOS-65-64-minimal /]# vzctl compact 101
```

```
Trying to find free extents bigger than 0 bytes
```

```
Waiting
```

```
Call FITRIM, for minlen=33554432
```

```
Call FITRIM, for minlen=16777216
```

```
Call FITRIM, for minlen=8388608
```

```
Call FITRIM, for minlen=4194304
```

```
Call FITRIM, for minlen=2097152
```

```
Call FITRIM, for minlen=1048576
```

```
0 clusters have been relocated
```

```
[root@CentOS-65-64-minimal /]# uname -a
```

```
Linux CentOS-65-64-minimal 2.6.32-042stab088.4 #1 SMP Thu Apr 3 17:41:05 MSK 2014
```

```
x86_64 x86_64 x86_64 GNU/Linux
```

Thanks
