Hello

im new her this is the first time I use open vz
I have a cents 6 server and openVZ installed I want to perform the update of open vz but u have an erreur

Erreur : Paquet : vzkernel-2.6.32-042stab108.5.x86_64 (openvz-kernel-rhel6)
Requiert : kernel-firmware >= 2.6.32-504.16.2.el6
Installé : kernel-firmware-2.6.32-504.3.3.el6.noarch (@updates)
kernel-firmware = 2.6.32-504.3.3.el6
Vous pouvez essayer d'utiliser --skip-broken pour contourner le problème
Vous pouvez essayer d'exécuter : rpm -Va --nofiles --nodigest

can you help me Pleas

Hi.

I don't use CentOS, but make sure you download the packages linked at the Download page (I'm not allowed to post links yet)

Regards.
