Hi everyone,

I can't install vzkernel on linux kernel 3.10.0-123.el7.x86_64.

Installation stop with the message:

Error: Package: vzkernel-2.6.32-042stab108.8.x86_64 (openvz-kernel-rhel6)

Requires: /sbin/mkinitrd

You could try using --skip-broken to work around the problem

You could try running: rpm -Va --nofiles --nodigest

I have a problem, only with kernel >=3.

Do you know any solution.

Thank you.

What were you trying to do, install a rhel6 vzkernel on a rhel7 system, or..?
