Hi,

When i try to download the template from the openvz repo "
download.openvz.org/template/precreated/ubuntu-15.04-x86_64.tar.gz" i get the following error :-

The requested URL /template/precreated/ubuntu-15.04-x86_64.tar.gz was not found on this server.

Apache/2.2.15 (CentOS) Server at download.openvz.org Port 443

Can some one from openvz team look into it.

Regards,

Sid Rele

I see in contrib folder this one:

https://download.openvz.org/template/precreated/contrib/ubuntu-1504-minimal-x86_64.tar.xz

don't know if there should exist your mentioned template

Same problem also exists for 64-bit Ubuntu 14.04 and many other 64-bit precreated templates.
