I rebooted the server and and openVZ is not starting

I checked grub.conf there value is default=1 and I changed it to 0 and rebooted but still same problem.

Grub.conf details

```
default=0
timeout=5
splashimage=(hd0,0)/grub/splash.xpm.gz

what exactly does not started?

Service openvz does not started, or kernel, or init or what?

Try to provide more useful information... aka logs, errors and so on.

I updated the server and it changed the grub.conf.
I modified the grub.conf rebooted it works.
Solved now.
