Subject: Expose VZLinux 8 as RHEL/Centos - possible?

Hi there,
I installed VZLinux 8 on one of our servers for the first time today.
And unfortunately at the same time had the problem that the MARIADB installer refused the automated installation because it doesn't know "VZLinux" ... Is it possible to set VZLinux so that it exposes itself as RHEL or CENTOS 8?
Many Thanks
Andy

really noone, nothing?

I think I can remember reading somewhere that VZLinux should have this functionality ... but unfortunately I can't find any information about it or the forum entry where I read this info ...

In case someone needs the information, it has been added to the Docs after my request:
https://github.com/vzlinux/docs#masking-virtuozzo-linux-as-c entos-or-redhat-enterprise-linux
