Hello,

<https://download.openvz.org/> has been down since yesterday.

Are there any available mirrors that could be used until it returns?

You can find list of mirrors and its state at <https://mirrors.openvz.org/>

We have migrated OpenVz infrastructure in new Datacenter.

In general all should work correctly now, but we cannot exclude some minor troubles.

Please port to [bugs.openvz.org](https://bugs.openvz.org) about all noticed issues,

unlike the forum, the bug-tracker is checked more or less regularly.

Thank you,
