Subject: OpenVZ7 - vzoversell or vzmemcheck alternative
Posted by numington135 on Wed, 24 Aug 2022 15:56:22 GMT

We have a custom monitoring script that we used on our VZ6 nodes, but upon conversion to VZ7 we realized that vzmemcheck is no longer available.

From the docs, I found that vzoversell was a similar tool, but it also appears to have reached EOL and was not included in VZ7.

Is there an alternative way to get the memory info for all VPS?
