Subject: OIpenVZ cannot be installed on Centos 8 ?
Posted by hallbook on Sun, 20 Oct 2024 22:27:40 GMT

Hello, Everybody !

I can't install OpenVZ on CentOS 8 RHl8, Kernel and other modules don't install,

So OpenVZ doesn't work on CentOS 8?
I have it installed and working on CentOS 7.9, very well.
Is there any alternative? Any replacement?
Thank you very much!
