hello all,
i install the plesk panel on the vps. the install completed correctly but the mailman don't work.

```
service mailman restart
Shutting down mailman: Traceback (most recent call last):
  File "/usr/lib/mailman/bin/mailmanctl", line 110, in ?
    from Mailman import Utils
  File "/usr/lib/mailman/Mailman/Utils.py", line 30, in ?
    import re
  File "/usr/lib/python2.4/re.py", line 5, in ?
    from sre import *
  File "/usr/lib/python2.4/sre.py", line 98, in ?
    import sre_parse
ImportError: No module named sre_parse
                                                    [FAILED]
Starting mailman: Traceback (most recent call last):
  File "/usr/lib/mailman/bin/mailmanctl", line 110, in ?
  File "/usr/lib/mailman/Mailman/Utils.py", line 31, in ?
  File "/usr/lib/python2.4/cgi.py", line 40, in ?
    import mimetools
  File "/usr/lib/python2.4/mimetools.py", line 6, in ?
    import tempfile
  File "/usr/lib/python2.4/tempfile.py", line 33, in ?
    from random import Random as _Random
  File "/usr/lib/python2.4/random.py", line 69, in ?
    import _random
ImportError: No module named _random
                                                    [FAILED]
```

what's happen?

bye

According to:
> import sre_parse
> ImportError: No module named sre_parse
it looks like your system lacks some Python modules.

Check your installation and (re)install required packages.
