Hi,
 I want to use OpenVZ, but I need kernel 2.6.16 or higher. There is only
'test' such kernel available on OpenVZ.org. Are there any features
missing? How much is the kernel unstable?
Thx Jarda

I'm using the latest kernel for about half a year without a single
problem. In most cases it's stable enough for using, but not enough
certified for production environments.

BR,
Martin

Thanks,
Dmitry.
