Subject: Resource Groups for VE's

Hello,

is there any plan to implement "resource groups" for VE's?

I'd _very much_ like to see the possibility to allocate a certain resource pool to a certain set of VE's. These VE's should all share the resources available in the pool.

Do you mean the ability to have the same UBC (resource beancounter) for a set of VEs?

It is quite possible to have such functionality, though std vzctl doesn't provide it.
Right now, resource management is fully independant from virtualization itself.
