The errors say - that your hard disk is damaged.

This describes the same error:
http://forum.openvz.org/index.php?t=msg&goto=9618&&a mp;srch=end_request#msg_9618

I think it is a kernel bug not a hardware error.

Hello,

Do you use VT6420 chipset?

Thanks.

nt1303,

do you know whether RHEL5 based OVZ kernels suffer from the same problem?
If yes, then we have to post a bug to RHEL bugzilla...
If not, you can safely use RHEL5 based kernels then...

Thanks,
Kirill

Hi all,

Thx for your support. Hard disk does not error, because some VE have been spam mail...
