
Subject: [PATCH] More vzdquota debugging for #341, #116, #177
Posted by [Alexey Dobriyan](#) on Mon, 13 Nov 2006 16:22:06 GMT
[View Forum Message](#) <> [Reply to Message](#)

- * Extend ->origin into array for previous origin tracking.
- * Print last two origins in debugging message.
- * Also print i_mode, i_op, i_fop, ... of the offending inode.

```
