You need to get second level quota's running within VPS. Have you
followed the instructions here?

http://wiki.openvz.org/Cpanel_quotas

Sorry if I misunderstand you.

Subject: OpenVZ quota problem
Posted by jbravo on Fri, 17 Nov 2006 14:42:31 GMT
View Forum Message <> Reply to Message

Hi all,

Well I have this problem with two differents servers, my kernel is:
2.6.8-022stab078.14-smp

I have working the quotas but some day the quotas don't work. And I
can't create users using cPanel or DirectAdmin.

Sometimes I fixed it doing that:
vzctl stop VID
vzquota drop VID

vzctl start VID

But now does not work. I don't know what more to do.

Thanks

This is the error that I have

edquota: Cannot set quota for user 32338 from kernel on /dev/simfs: No
such process
edquota: Can't write quota for 32338 on /dev/simfs: No such process

what exactly doesn't work in your case?
what commands? instructions?

Thanks
Kirill

please strace edquota
what OS is used inside VE?

Im using FC4 in all my VE,
when I type:
root@abraham [/scripts]# quotacheck -avug
quotacheck: Quota for users is enabled on mountpoint / so quotacheck
might damage the file.
Please turn quotas off or use -f to force checking.

And I tried quota (user) for all users and I get:
root@abraham [/home]# quota lealanga
Disk quotas for user lealanga (uid 32138): none
root@abraham [/home]# quota aposada
Disk quotas for user aposada (uid 32010): none

can you dump the output of
ls -la /
from inside VE?

The very widespread reason of this problem is usual Linux quota runing

on the same partion (on HN), there private area of VE in question resides.
Please, check it.

Thanks.

I tried

rm -rf /aquota.user 2>/dev/null
rm -rf /aquota.group 2>/dev/null
unlink /aquota.user 2>/dev/null
unlink /aquota.group 2>/dev/null
for x in `find /proc/vz/vzaquota/ | tail -1 | xargs find | tail -2 `; do
ln -s $x /; done

And now:

-bash-3.00# ls -l /
total 1140
lrwxr-xr-x 1 root root 39 Nov 17 11:19 aquota.group ->
/proc/vz/vzaquota/0000000f/aquota.group
drwx--x--x 3 root root 4096 Oct 2 09:00 backups
drwxr-xr-x 2 root root 4096 Oct 2 16:59 bin
drwxr-xr-x 2 root root 4096 May 22 2005 boot
-rwxr-xr-x 1 root root 969485 Sep 14 10:03 cpanel
drwxr-xr-x 4 root root 20480 Nov 17 11:14 dev

```
drwxr-xr-x   58 root root  12288 Nov 17 11:19 etc
drwx--x--x  219 root root   4096 Nov 17 09:28 home
drwxr-xr-x    8 root root   4096 Sep 27 14:14 installd
drwxr-xr-x    8 root root   4096 Sep 27 11:37 lib
drwxr-xr-x    2 root root   4096 May 22  2005 media
drwxr-xr-x    2 root root   4096 May 22  2005 mnt
drwxr-xr-x    2 root root   4096 Nov  3 12:32 myscripts
drwxr-xr-x    2 root root   4096 May 22  2005 opt
dr-xr-xr-x  452 root root      0 Nov 17 11:14 proc
drwxr-x---   14 root root   4096 Nov 17 11:14 root
drwxr-xr-x    2 root root   4096 Sep 26 13:57 sbin
drwxr-xr-x    3 root root  20480 Nov 17 09:45 scripts
drwxr-xr-x    2 root root   4096 May 22  2005 selinux
drwxr-xr-x    3 root root   4096 Oct  3 19:55 software
drwxr-xr-x    2 root root   4096 May 22  2005 srv
drwxr-xr-x    2 root root   4096 May 22  2005 sys
drwxrwxrwt    6 root root  61440 Nov 17 11:19 tmp
drwxr-xr-x   16 root root   4096 Nov 17 11:15 usr
drwxr-xr-x   21 root root   4096 Oct  2 13:40 var
-bash-3.00#
```

If I type: quota colhost I get:
Disk quotas for user colhost (uid 32003): none

>> This is the error that I have

Subject: swap usage
Posted by hiro on Sun, 19 Nov 2006 10:44:30 GMT
View Forum Message <> Reply to Message

Hello

I just wondering that are there any way to show swap for each VE?
I know you can set up memory stuff by using "--meminfo", but can't
figure out how to set up swap space. Is anyone help me out?

Thanks!

Hiro

Hello,

At the moment you can only set this value either to zero (while setting
--meminfo it happens),
or to real value of swap on HN --meminfo none, default behavior).

HTH,
Vasily.

Vasily

Thanks for the explanation, that case I might end up using default behavior.

Hiro
