Hi All,

I'm having a problem migrating a guest from one machine to another. It's stopping with an error about the second level quotas, which I'm not using.

Is there a way to disable that?

Regards

Darryl

This is easy to disable 2nd level quota: just remove line with QUTAUGIDLIMIT for /etc/vz.conf and /etc/conf/<veid>.conf and restart VE. You should do it on both nodes: source and destination.

HTH,
Vasily.
