Hello,

sorry for flooding list so much, but after upgrading to
2.6.18-028test005.1 I realized that iptables stoped working
for me in VE:

root@zalohovadlo:~# iptables -L
FATAL: Could not load /lib/modules/2.6.18-028test005/modules.dep: No
such file or directory
iptables v1.2.11: can't initialize iptables table `filter': Permission
denied (you must be root)
Perhaps iptables or your kernel needs to be upgraded.

On same system with 2.6.16-026test017 is everything working fine.

Is there way how to fix this?

Best regards

Hello,

It is know problem.
Fixed in git:
http://git.openvz.org/?p=linux-2.6.18-openvz;a=commit;h=ad5ac420fed40b7df3b86cf5cb56f11cd88030ff

HTH,
Vasily.
