[root@XXXXXX ~]# uname -ar

Linux XXXXXXXXXXXXXXXXXXXX 2.6.9-023stab037.3-smp #1 SMP Wed Dec 13 19:31:35 MSK
2006 x86_64 x86_64 x86_64 GNU/Linux

[root@XXXXXX ~]# uptime

03:48:55 up 10 days, 6:15, 1 user, load average: 0.87, 0.53, 0.55

I saw this post:

http://forum.openvz.org/index.php?t=msg&goto=8609&&a mp;srch=negative+vm_rss#msg_8609

Unlike that poster, it seems like nothing's wrong with any of my VEs. No additional modules,
binary stable kernel.

HW node is RHEL4u4 x64

VE is CentOS 4.4 32-bit

Hello, thank you for the report.

I reopened the bug http://bugzilla.openvz.org/show_bug.cgi?id=252.

Please, can you inform us, did you compile kernel or install it from rpm?

If you compiled, than, please, provide you config file.

Thanks,
Vasily.

just to calm you a bit: this is more a debug message and doesn't affect normal work of your VEs.
if it is reproducible easily it would be nice if you could help to track it down.

Binary kernel from openvz.org

Discussion taken to bugzilla
