Subject: Hybodus OpenVZ Template :)
Posted by phpfreak on Sun, 08 Jan 2006 22:36:05 GMT

Just wanted to let anyone who uses Hybodus to know that there's a template available for CentOS 4 with the custom compiled versions of Apache + MySQL and PHP with Hybodus installed and tweaked out for VPS use:

http://www.hybodus.com/openvz-guide.php

You'll need a Hybodus License to run Hybodus itself though.

Enjoy
