Hello,
When I try to install OpenVZ Kernel, I see this error.

WARNING: No module ahci found for kernel 2.6.9-023stab037.3, continuing
anyway
grubby fatal error: unable to find a suitable template

Please let me know what to do?

Please see http://wiki.openvz.org/Warning:_no_module_found
> grubby fatal error: unable to find a suitable template
This is something I don't really know about. What is your distribution?
Are you able to succesfully install new distro kernels?
