Hello,

Can one please tell me which limit is what in Qos?

```
dcachesize 0 0 2147483646 2147483646 0
dgramrcvbuf 0 1400 8388608 8388608 0
dummy 0 0 0 0 0
kmemsize 3219620 3824839 2147483646 2147483646 0
lockedpages 0 0 32 32 0
numfile 850 1315 23999976 23999976 0
numflock 4 11 999999 999999 0
numiptent 10 10 128 128 0
numothersock 7 10 7999992 7999992 0
numproc 44 75 999999 999999 0
numpty 2 4 16 16 0
numsiginfo 0 6 999999 999999 0
numtcpsock 14 26 7999992 7999992 0
oomguarpages 16254 20374 6144 2147483647 0
othersockbuf 4472 14200 8388608 8388608 0
physpages 16254 20374 0 2147483647 0
privvmpages 57851 131023 131072 131072 1
shmpages 1630 1950 8192 8192 0
tcprcvbuf 229376 378456 8388608 8388608 0
tcpsndbuf 138632 359996 8388608 8388608 0
vmguarpages 0 0 65536 2147483647 0
```

And my other question is,

Whats privvmpages ? it is always high for my VPSs (see on top) and its warning. Howto set it up properly?

Thank you!

Have you read the UBC page in the wiki or the openvz manual yet? Please read it first as it explains all of what you are asking. After reading it, I will be happy to answer any specific questions about the UBC metrics.

is the url, <http://wiki.openvz.org/Category:UBC> ?

I am reading it now (after asking my question...)

But still dont understand that priv... thing. At the moment, VPS has 2 Ips and 1 is accessible via ssh and another not.

whats that priv... thing and how can I set the limits for best performance on a P4 3.2Ghz dual core + 4gb ram machine?

Thank you
