hi guys....!!

im using FC5...nd installed openvz alongwith vzctl,vzquota.

But i dont know which OS template i should use for this....!!

So can u plz give me the exact version of template cache for installation.....!!!!!!

Reply as early as possible...Thanx in advance...!!!

use any OS template available on [download.openvz.org](http://download.openvz.org).

OS template is simply a pack of the Linux Distribution.

So if you want to run Debian, use debian template, if centos, use centos one.
