i can't use iptable in VE on server Installed with FC6 and kernel  
2.6.18-028test007

```
root@virt121 [/]# /etc/init.d/iptables restart
```

```
Flushing firewall rules: [ OK ]
```

```
Setting chains to policy ACCEPT: mangle filter [ OK ]
```

```
Unloading iptables modules: Ismod: QM_MODULES: Function not implemented
```

```
Ismod: QM_MODULES: Function not implemented  
[FAILED]
```

```
Applying iptables firewall rules: [ OK ]
```

IN VE ->

-> Ismod

```
Module          Size Used by Tainted: P
```

```
Ismod: QM_MODULES: Function not implemented
```

i don't understand why ..

Thanks

openvz user guide. You can find it here:  
<http://download.openvz.org/doc/OpenVZ-Users-Guide.pdf>

Good luck.

Romeo
