Please, explain, what do you mean.
OpenVZ checkpointing supports checkpoint of network connections, but I'm not sure that this is what you mean.

Actually im working on Checkpoint/Restart of TCP/IP.......!!!!
Im going to save the network state(Socket and their structures,etc) for checkpoint and restart......so i want to knw......Is it possible to do TCP/IP check pointing in openvz ....???????

So plz tell me........can we checkpoint the communication between the two VE's.

tht is the data which is going to transfer bet two VE's is checkpointed by openvz.......!!!!!

One more thing u told tht openvz supports network checkpointing.......so is this feature already available or it is under development.....!!!!!
