I'll know, that openvz project is focused to Redhat, and some Redhat system.

But maybe with a view of compatibility it would be quite good to change in file /etc/init.d/vz

this

```
# Source function library.  
. /etc/rc.d/init.d/functions
```

to something like that:

```
# Source function library.  
if [ -f /etc/init.d/functions ]; then  
    . /etc/init.d/functions  
elif [ -f /etc/rc.d/init.d/functions ]; then  
    . /etc/rc.d/init.d/functions  
else  
    echo "Could not find functions file. Exiting."  
    exit 1  
fi
```

Can you then please file a bug to bugzilla.openvz.org, product openvz, component vzctl?
