Hi there,

on a very busy OpenVZ Server i have a lot of:

Feb 12 15:25:51 server12 kernel: TCP: time wait bucket table overflow

entries in my syslog file.

Any ideas?

Kernel is 2.6.18-028test015.1+31-ovz-smp

Thomas,

can you check this one please:

http://bugzilla.openvz.org/show_bug.cgi?id=460

Thanks,
Kirill

Hi Kirill,

tcp_max_tw_buckets_ve and changing /proc/sys/net/ipv4/
tcp_max_tw_kmem_fraction to 256 did not solve this problem.

Regards,
Thomas

Most probably the right name is
/proc/sys/net/ipv4/tcp_max_tw_buckets_ub. It is per-VE timewait bucket
limit, apparently it's set too low (1024). Please increase it several
times (8x or 16x) and report your results to the above bug.
