
Subject: *CLOSED* Invalid packets from HN
Posted by [heruan](#) on Sun, 25 Feb 2007 09:37:45 GMT
[View Forum Message](#) <> [Reply to Message](#)

My network configuration is:

```
LAN1 <==> GATEWAY <==> HN=VEs
192.168.11.0/24 || 192.168.10.0/24
LAN2
192.168.12.0/24
```

When I try to access HN (or VEs) from LAN1 or LAN2 the connection is very slow and on gateway logs I see a lot of:

```
Feb 25 10:00:29 gw1 kernel: Invalid packet: IN=eth1 OUT=eth1 SRC=192.168.10.13

Feb 25 10:00:49 gw1 kernel: Invalid packet: IN=eth1 OUT=eth1 SRC=192.168.10.13
DST=192.168.12.4 LEN=64 TOS=0x00 PREC=0x00 TTL=63 ID=3479 DF PROTO=TCP SPT=22
DPT=52313 WINDOW=1080 RES=0x00 ACK URGP=0

referring to the iptables rule:

```
iptables -A bad_packets -p ALL -m state --state INVALID -j LOG --log-prefix "Invalid packet: "  
iptables -A bad_packets -p ALL -m state --state INVALID -j DROP
```

Routing between LAN1 and LAN2 runs fine.

I can't figure out why packets from the HN are marked as INVALID...

I noticed this is not an OpenVZ bug since similar errors appear also on other DMZ machines.
Sorry!
