Hi!
Does anybody know if OpenVZ works with Red Hat Enterprise Linux 3??
Or it only works with Fedora & CentOS 4...

It works. You need to install python-urlgrabber, python-sqlite and python-elementtree packets in order to get vzyum works.

When I try to install the kernel (rpm -ihv ovzkernel-name*.rpm), the following error appears "module-init-tools is needed". The official RHLE's homepage don't have the module-init-tools RPM package to download.

install with --nodeps.
RHEL3 contains modutils rpm, which works with 2.6 kernels.

which version of modutils do you use?

Subject: Re: OpenVZ OS Requirements

Dim, is wrong I suppose.
RHEL3 modutils doesn't support 2.6 kernels.
You need to install modutils from Fedora-Core-2 which supports both 2.4/2.6 kernels.
