Hi,

I want to have a connection between our vpn box and one VE.
I successfully established a connections between the HN and the vpn box.
The VE cannot ping inside though (while the HN can).

Since I only need one port, I could use an ssh tunnel like that:

```
ssh -l root <HN_IP> -L 10389:<10.0.0.1>:389 -N
```

Is there a way to do that proper?

Thanks,
Kai

If you can't ping outside box from VE, then there are some problems in you setup.
Please, read http://wiki.openvz.org/Reporting_OpenVZ_problem#Network_related_problem
(and "Always report" part of this article too) and post here all required information.

Thank you,
Vasily.
