Hello!

I have a problem. I want to run it.
I unpacked the tarballs into the directories, and I run the vz file:

```
# /etc/init.d/vz start
```

And i become this error message:

```
/etc/init.d/vz: 107: Syntax error: "(" unexpected
```

All of the versions have this problem.
Can anyone help me to fix the problem??

Sounds like the file is modified or syntaxed from the source, run these commands from the HN so that we can help.

```
rpm -qa | grep vzctl; rpm -V vzctl
```
