Hello, I am using patch patch-ovz028stab023.1-combined, and expected to see this io accounting code in it:

<http://git.openvz.org/?p=linux-2.6.18-openvz;a=commitdiff;h=0526b6634bb00e23ab37f2eda7b9a5a2b02ee3cc>

Is patch-ovz028stab023.1-combined the most recent patch to be using for 2.6.18? I don't see this commit from Dec 13 in it.

```
# grep show_io_stats patch-ovz028stab023.1-combined
#
```

--

```

Rick,

This code was reworked after the commit you pointed to.
Nowdays function show_io_stats() is renamed to bc_ioacct_show()
and I/O-related code is moved to io_acct.c

Thanks,
Kirill
