Just set up OpenVZ on a new machine and followed how I did it on my first but main difference is I am using a different kernel build.

```
root@stephen2:/usr/src/openvz# vzctl start 100
```

```
UB parameter kmemsize not set
```

```
UB parameter lockedpages not set
```

```
UB parameter privvmpages not set
```

```
UB parameter shmpages not set
```

```
UB parameter numproc not set
```

```
UB parameter physpages not set
```

```
UB parameter vmguarpages not set
```

```
UB parameter oomguarpages not set
```

```
UB parameter numtcpsock not set
```

```
UB parameter numflock not set
```

```
UB parameter numpty not set
```

```
UB parameter numsiginfo not set
```

```
UB parameter tcpsndbuf not set
```

```
UB parameter tcprcvbuf not set
```

```
UB parameter othersockbuf not set
```

```
UB parameter dgramrcvbuf not set
```

```
UB parameter numothersock not set
```

```
UB parameter numfile not set
```

```
UB parameter dcachesize not set
```

```
UB parameter numiptent not set
```

Wtf is its problem? :)

Thanks,  
Stephen

Stephen,

I guess your VE config file is missing printed resource-related parameters.

Thanks,  
Kirill
