Just set up OpenVZ on a new machine and followed how I did it on my first  
but main difference is I am using a different kernel build.

```
root@stephen2:/usr/src/openvz# vzctl start 100
UB parameter kmemsize not set
UB parameter lockedpages not set
UB parameter privvmpages not set
UB parameter shmpages not set
UB parameter numproc not set
UB parameter physpages not set
UB parameter vmguarpages not set
UB parameter oomguarpages not set
UB parameter numtcpsock not set
UB parameter numflock not set
UB parameter numpyt not set
UB parameter numsiginfo not set
UB parameter tcpsndbuf not set
UB parameter tcprcvbuf not set
UB parameter othersockbuf not set
UB parameter dgramrcvbuf not set
UB parameter numothersock not set
UB parameter numfile not set
UB parameter dcachesize not set
UB parameter numiptent not set
```

Wtf is its problem? :)

Thanks,  
Stephen

Stephen,

I guess your VE config file is missing printed resource-related parameters.

Thanks,  
Kirill
