Just set up OpenVZ on a new machine and followed how I did it on my first but main difference is I am using a different kernel build.

```
root@stephen2:/usr/src/opensvz# vzctl start 100
```

UB parameter kmemsize not set

UB parameter lockedpages not set

UB parameter privvmpages not set

UB parameter shmpages not set

UB parameter numproc not set

UB parameter physpages not set

UB parameter vmguarpages not set

UB parameter oomguarpages not set

UB parameter numtcpsock not set

UB parameter numflock not set

UB parameter numpty not set

UB parameter numsiginfo not set

UB parameter tcpsndbuf not set

UB parameter tcprcvbuf not set

UB parameter othersockbuf not set

UB parameter dgramrcvbuf not set

UB parameter numothersock not set

UB parameter numfile not set

UB parameter dcachesize not set

UB parameter numiptent not set

Wtf is its problem? :)

Thanks,  
Stephen

Stephen,

I guess your VE config file is missing printed resource-related parameters.

Thanks,  
Kirill
