Subject: how to migrate vps's to new node?

We want to migrate the VPS's to new hardware node. Some VPS size is over 40gb.
I would like to know how can we take backup of the hardware node including vps's and restore them to new vps.
Is there any backup/restore utility for openvz?

Thanks

read http://wiki.openvz.org/Checkpointing_and_live_migration and man pages on vzctl/vzmigrate.

Vasily.
