Subject: mailing list settings removes From: ?
Posted by Cedric Le Goater on Sun, 22 Apr 2007 21:05:30 GMT

Hello !

Whenever I reply to an email sent on the openvz mailing the To: used is
devel@openvz.org, which is ok, but the person who it was from, is not in
the Cc: ...

This feels wrong. Can you confirm the behavior and eventually fix it ?

Many thanks,

C.

Cedric,

In fact the mailman was adding explicit "Reply-To:" header so replies
would go to the list. It didn't strip neither "From:" nor existing
"Reply-To:" headers -- they were intact. Still, it looks like my MUA
(Thunderbird) ignores everything if Reply-To is set.

So I removed this setting, thus from now on mailman will not add
explicit Reply-To.

Regards,
  Kir.

It definitely works better now when i do a "Reply All".

Thanks,

C.
