Hi all,

Anyone knows how can I enable the sound support in my openvz 2.6.18-stab kernel?

```
#  
# Sound  
#  
# CONFIG_SOUND is not set
```

Thanks

Sidnei

make menuconfig

You can enable it in the same fashion you enable or disable any other options when you build a custom kernel -- something you will need to do if the binary packages supplied don't meet your needs.

Regards,
Daniel

Check this one: http://wiki.openvz.org/Kernel_build
or use kernel based on RHEL5, which has sound compiled.

Thanks,
Kirill
