Hello everybody

I run on OVZ kernel 2.6.12-28-024stab
I would like to patch it to run on last stab kernel
Can you tell me how do it

Thanks a lot

André

Hello,

AFAIU, you're running Debian, so you can just install the latest binary Debian package (e.g. from debian.systs.org). If you still want to compile kernel by yourself, read this article:
http://wiki.openvz.org/Kernel_build#Rebuilding_kernel_from_sources

HTH,
Vasily
