Sorry, I don't get you, can you tell me, what exactly do you mean saying "to secure /tmp"?

Thanks.

he means /tmp mounted with no exec, no suid. "secure tmp" is a webhostingtalk newbie term for such.

Sory for my dullness , but why performing:

```
white:# mount -t tmpfs -o noexec,nosuid tmpfs /tmp/
white:# cat /proc/mounts
simfs / simfs rw 0 0
proc /proc proc rw 0 0
sysfs /sys sysfs rw 0 0
devpts /dev/pts devpts rw 0 0
tmpfs /dev/shm tmpfs rw 0 0
tmpfs /tmp tmpfs rw,nosuid,noexec 0 0
```

in VE doesn't help?

Thank you,  
Vasily.
