## Subject: Does 2.6.18 support/account io wait cpu time Posted by rickb on Mon, 21 May 2007 12:01:19 GMT

Hello. I have been upgrading my nodes from openvz 2.6.9 to 2.6.18. One of the major indicators of a nodes workload to me is the % of time spent in iowait over various time periods. I immediately noticed that 2.6.18 reported no iowait which I assumed was due to better fs caching, prioritization, per ve io fairness, etc. But, now I think that iowait is included in idle time. After running processes which undoubtedly introduce iowait (raid recovery, mkfs, bonnie++, etc) to a system, none is accounted.

Am I missing something, is this a bug?

sar, dstat, vmstat, etc all report 0% iowait (but I think theres some there!)

Kir, dev, Vasily- can you give me your thoughts on this? Do you know if the 2.6.18 kernel records cpu accounting differently and I need to update vmstat?

This is rather important to me, because now I feel like I do not know how much cpu idle time there really is (as it could all be iowait).

Thanks! Rick

Hello Rick,

Sorry, I've somehow missed your message! I can approve that in current 2.6.18 OVZ kernel iowait statistic is broken, so I filled the bug report: http://bugzilla.openvz.org/show\_bug.cgi?id=588

Thank you for the report, Vasily
