there's some info at
http://wiki.openvz.org/Processes_scope_and_visibility

check out the vzpid shell script included in the vzctl package, I think this is what you are looking for.

Quote:[root@hydrogen vz]# vzpid 18972
Pid VEID Name
18972 9889346 mysqld
[root@hydrogen vz]# vzpid 18969
Pid VEID Name
18969 9889537 exim
