---

I have recently moved a test vps over to a new second hard drive.

And have setup the new hard drive under partition "vps" the new vps is setup correctly under /vps/root and /vps/private.

However when i try to start the vps on the 2nd hard drive it fails displaying a quota error  
"Starting VE ...  
vzquota : (error) Quota on syscall for 202: No such file or directory  
vzquota on failed [3]"

Do i need to enable an option on the new partition/hard disk.

Thanks

Hello,

Can you post here the following information, please:

VEID="ID of VE in question"

cat /etc/vz/vz.conf

cat /etc/vz/conf/\$VEID.conf

fdisk -l

cat /proc/mounts

Thank you,

Vasily.

/sys /vz/root/208/sys sysfs rw 0 0
none /vz/root/208/dev/pts devpts rw 0 0
```

I know in vz.conf it is still set to /vz/root and vz/private.

I want to be able to test to make sure that the VPS will run on the second Hard Disk, which is why i created a test VPS and just set the 202.conf to /vps/root and /vps/private  
Thanks

Ahem, I know the reason vzuota should be dropped before start of VE after moving (you should do it only once):

```
# vzctl start 202
Starting VE ...
vzquota : (error) Quota on syscall for 202: No such file or directory
vzquota on failed [3]
# vzquota drop 202
# vzctl start 202
Starting VE ...
Initializing quota ...
VE is mounted
Setting CPU units: 1000
VE start in progress...
```

HTH,  
Vasily.
